SUMMARY

Product-focused engineer working where product thinking, design and engineering meet. I build AI-powered products, e-commerce platforms and customer-facing experiences — translating requirements into user flows and interfaces, prototyping with AI tools, implementing in React/Next.js and Node/Python, and taking releases to production. Currently Technical Program Manager at Kompella Technologies, owning roadmap and release delivery for AI products including Vorena AI.

CORE SKILLS

- Product ownership & release delivery
- User flows, user stories & acceptance criteria
- UI/UX & visual design (Figma, Framer)
- AI-assisted prototyping (Cursor, Claude Code, v0, Lovable)
- React, Next.js, TypeScript, Tailwind CSS
- Node.js, Express, Python, FastAPI
- LLM integration, vision AI, semantic search
- Cloud deployment, CI/CD, API design

PROFESSIONAL EXPERIENCE

Kompella Technologies Pvt Ltd · Delhi, India

Technical Program Manager — Jul 2026 – Present
Full Stack Developer — Feb 2026 – Jul 2026

- Own roadmap and release delivery for AI-powered products.
- Work on Vorena AI — an AI shopping assistant for Shopify — across product discovery, engineering and merchant go-to-market.
- Coordinate InnerVeda product delivery; built the AI content pipeline behind its meditation library.
- Translate product requirements for outsourced engineering teams and coordinate implementation and releases.
- Work across product, engineering and business requirements.

Tab Advisory and Support LLP · Independent consulting

IT & Technology Consultant — Aug 2026 – Present

- IT strategy, domain and DNS management, and hosting architecture.
- Built and deployed the company website with Astro and Cloudflare Pages, with serverless enquiry handling and SEO metadata.

YUCA Lifestyle · Independent contract

Independent Contractor — Feb 2025 – Present

- Built and maintain the YUCA e-commerce platform on the MERN stack and cloud infrastructure.
- Own backend, frontend, product catalogue and shopping experience, billing and payment (Razorpay) and logistics integration.
- Handle infrastructure and deployment, frontend performance and database query optimisation.

OneShopAI · Remote

Full Stack Developer — Aug 2025 – Jan 2026

- Designed and shipped an AI-powered phishing detection agent combining LLM inference with rule-based validation.
- Built core backend services for an AI marketplace.
- Implemented modular services, versioned API contracts and CI/CD deployment.

Surepass Technologies · Delhi, India
Front-End Developer, Team Lead — Jan 2024 – Jan 2025

- Led frontend development through product release cycles.
- Managed code review and release readiness.
- Built internal automation tools and documented team processes to reduce duplicated work.

Sunframes Software LLP · Delhi, India
Backend Developer Intern — Sep 2023 – Dec 2023

- Built and deployed REST APIs.
- Designed database schemas; optimised queries and indexing.

SELECTED PROJECTS

Nazarana Silver — gifting e-commerce platform

nazaranasilver.com

END-TO-END OWNER · ONGOING · BUILT AND RUN BY ME

- Own the platform end to end — product, interface design, Next.js engineering, integrations, SEO and deployment — for a silver-plated gifting brand selling to consumers, companies and weddings.
- Built a gift planner for bulk buyers (headcount + per-gift budget → every piece that fits, exported as a PDF with the buyer's logo for approval) and an occasion-led quote wizard that hands enquiries to WhatsApp.
- Single-page checkout with PIN-code delivery charges, GST and optional GSTIN for tax invoices; Razorpay payments; Xpressbees shipping across India and Porter in Delhi NCR.
- Occasion and city landing pages, schema.org structured data, and analytics through Google Tag Manager and the Meta Pixel.

YUCA — e-commerce platform

yucalifestyle.com

INDEPENDENT CONTRACTOR · FEB 2025 – PRESENT · BUILT AND MAINTAINED BY ME

- Built and maintain a MERN e-commerce platform for a handcrafted home-objects brand: catalogue, product pages, cart and single-page checkout.
- Integrated Razorpay payments (UPI, cards, net banking, wallets) and a logistics partner for order fulfilment.
- Own infrastructure and deployment, frontend performance on an image-led storefront, and database query optimisation.
- Designed the shopping flow around a brand-led, editorial interface while keeping commerce conventions familiar.

Vorena AI — AI shopping assistant for Shopify

vorena.ai

KOMPELLA TECHNOLOGIES · FEB 2026 – PRESENT · TEAM PRODUCT

- Contribute to a team-built Shopify app offering conversational product discovery: vision-based catalogue enrichment, semantic search, recommendations with live price and stock, and add-to-cart in chat.
- Own roadmap and release delivery as TPM; previously hands-on feature development as Full Stack Developer.
- Write product requirements and acceptance criteria; coordinate merchant go-to-market and align technical and business requirements.

NKNZ Studio — creative studio website

studio-nknz.rawatvibhor53.workers.dev

PERSONAL PROJECT · 2026 · WORK IN PROGRESS (ILLUSTRATIVE PROJECT CONTENT)

- Designed and built a typography-led studio site: visual language, layout, scroll-driven interaction and responsive mobile design.
- Implemented in Next.js and deployed to Cloudflare Workers.

ADDITIONAL PRODUCT WORK

InnerVeda — AI meditation app · Kompella Technologies

Built the AI content pipeline behind the meditation library (automated generation, review workflow, in-app delivery); translated requirements for outsourced engineering and coordinated releases.

Course Gen AI — multi-agent LLM learning pipeline · Personal project · Nov 2025 – Present · In development

Turns learning resources into week-by-week learning paths using a skill ontology, prerequisite sequencing, Gemini-assisted drafting, quiz generation and a critic layer for completeness and difficulty alignment.

EDUCATION

B.Tech, Computer Science & Engineering 2019 – 2023

Dr. A.P.J. Abdul Kalam Technical University

TECHNICAL SKILLS

Product & delivery	Roadmaps & release planning, User stories & acceptance criteria, User flows, Requirements for outsourced teams, Cross-functional coordination, Technical feasibility
Design & prototyping	Figma, Framer, Cursor, Claude Code, v0, Lovable
Frontend	React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS
Backend	Node.js, Express, Python, FastAPI, PostgreSQL, MongoDB, Prisma
AI	LLM integration, Gemini API, Multi-agent workflows, Vision AI, Semantic search, Embeddings, Prompt engineering, Output validation
Infrastructure	AWS, Docker, Cloudflare, CI/CD, Serverless, API design, Production deployment
